

Modartt releases Shigeru Kawai SK-EX Concert Grand for PIANOTEQ

Modartt proudly presents the first physical model of Shigeru Kawai SK-EX Concert Grand piano, authorized by KAWAI and available as an instrument pack for **PIANOTEQ**.

Pianos made to perfection

The SK-EX Concert Grand is the pinnacle of Shigeru Kawai pianos, meticulously handcrafted in Ryuyo, Japan by extraordinarily skilled craftsmen, and prepared to perfection by Kawai's Master Piano Artisans. Each year, no more than 20 units are shaped and honed by these expert hands, providing a remarkable tone and a stunning response.

An accurate model inspiring creativity

Modartt research engineers developed a faithful physical model that captures the unique sound of the Shigeru Kawai SK-EX, from its hand-wound temaki bass strings to the shimmering brilliance of its highest notes. This **PIANOTEQ** model offers an exceptionally broad dynamic spectrum and superb power, suitable for pianists, producers, and composers alike.

Constant improvements, in collaboration with KAWAI

Modartt and KAWAI share a common philosophy: true artistry is a continuous evolution, always striving towards excellence. For this reason, the physical model at the heart of **PIANOTEQ** is constantly refined, providing an increasingly inspiring playing and listening experience. Extensive listening sessions and adjustments led Modartt to design 15 unique configurations of microphones, room settings and piano voicing, fitting many styles and approaches.
